This whole trouble is a cunning move of Jay Gould's to seare the Euglish bondholders of the road by making them believe that a big strike is on hand and that their property is likely to be ruined. With that leav before their eyes, Gould thinks they would sell out at low figures, and he would gobble up the property. We wish to put our men to work. We want to meet the managers, and if they are not pliant tools of Jay Gould we believe that it can be settled.

LONDON, August 25 —The seizure of the Caroline Islands by Germany remains a BOLD OPERATIONS BY INDIANS,

Lack of Protection—The Ute Indians Said to be Starving to Death

Apaches made a raid on Friday last on Ranch B, near San Pedro, Mexico, forty which have been increasingly vigorous. It is also true, and is now fully confirmed, that a few days before the annexation was announced, Emperor William wrote a very kind and fatherly letter to King Alfonso, but in all the correspondence there has been no promise by Germany to withdraw from the Carolines, and it is evident that if Spain were to assert her claims by force in the present state of the question it might easily result in a casus beldi. Just this contingency is liable to occur accidentally, owing to the character of the Spanish naval officer commanding the Phillipine Islands, to which the Carolines belong. He is known as the most headstrong patriot in the Spanish naval service, and he is always more than ready for a row. There has not been time enough since Germany's action for the Spanish Government to send him fresh orders and, and acting on general principles and previous instructions, he is quite capable of bundling the German intruders out neck and crop. The Spanish Government is fully aware of the Commander's fiery zeal, and is waiting with feverish anxiety for news from the Phillippines. miles south of this city. They carried off a number of horses. The raid was witnessed by a squad of soldiers, no interference was attempted A report which reached here to-day is that San Barnardino ranch, famous in connection with Indian hostilities, has been abandoned, owing to the bold depredations of the hostiles. A party of armed citizans left here for the Mexican border to assist in driving the Indians from United States soil.

Southern Ute Indians, from this time onward, 10,000 pounds of beef and 3,000 pounds of flour per week. This amount, the agent states, will be sufficient for all reasonable needs of the Indians. Commissioner Atkins states that he has received no reports which indicate that the Indians are in a starving condition, and he discredits all such statements. He further says that he believes such reports are inspired by interested army officers, who hope to be appointed Indian Agents, and thus secure snug bertha and escape army service. held a secret meeting here to-day to select a candidate for the coming campaign and to discuss the future policy of the Home Rule party. Addressing a public meeting Mr. Parnell said the triumph of the Irish cause was assured whether the Whigs or Tories would give as good a scheme of self-government as the Whigs. "Let Irish farmers," he said, "support the League and prove that they will not allow landlords to trample upon them during the ensuing winter."
